

Apollo H-2 Holiday Ornament

Festive ESP32-C6 LED ornament for Home Assistant — 100% of profit to charity

The Apollo H-2 is the second edition of Apollo's annual holiday ornament — a festive, music-playing LED decoration where 100% of the profit goes to charity. It ships pre-flashed with a simple firmware: press any of the four buttons on the back to play a classic holiday tune, each paired with its own LED effect. No setup is required to enjoy it out of the box.

Flashing the optional Wi-Fi firmware unlocks Home Assistant integration — changing the songs and LED effects, plus Bluetooth proxy and Bluetooth tracking. The H-2 runs ESPHome and can be powered over USB-C or by a rechargeable battery.

Key Specifications

Product	Apollo H-2 Annual Holiday Ornament (charity)
Manufacturer	Apollo Automation (Versailles, KY, USA)
Microcontroller	ESP32-C6 with 8 MB flash
LEDs	58 RGB LEDs plus a logo light
Controls	4 dedicated buttons (songs + lights)
Firmware	ESPHome — pre-flashed with 4 holiday tunes; Wi-Fi firmware optional
Connectivity	Wi-Fi (after flashing); Bluetooth proxy & tracking
Power	USB-C, or 16340 / RCR123A rechargeable battery (charger not included)
Battery shipping	Battery ships to USA only; EU source: nkon.nl
Integration	Home Assistant (optional, after flashing Wi-Fi firmware)
In the box	Assembled ornament; Apollo sticker

Preloaded Songs (rear buttons)

Button	Tune	LEDs
Button 1	Jingle Bells	Unique effect
Button 2	Rudolph the Red-Nosed Reindeer	Unique effect
Button 3	Let It Snow	Unique effect
Button 4	Blue Christmas	Unique effect

Each button plays its tune with a matching LED effect. With the Wi-Fi firmware, songs and effects can be changed from Home Assistant.

Configurations & Pricing

Donation tier	Price (USD)
Tier 1	\$17.99
Tier 2	\$24.99
Tier 3	\$29.99

All tiers are the same product with different donation amounts. 100% of the profit goes to charity — CASA of Lexington and the Open Home Foundation.

Features & Use Cases

- **Plug-and-play fun:** press a button to play a holiday tune with matching LED effects — no setup needed.
- **Home Assistant (optional):** flash the Wi-Fi firmware to change songs and effects and to automate the ornament.
- **Bluetooth proxy:** extend Home Assistant's Bluetooth range by using the H-2 as a proxy.
- **Bluetooth tracking:** track Bluetooth devices or beacons by proximity to the ornament.
- **Charitable gift:** every purchase supports CASA of Lexington and the Open Home Foundation.

Important Notes

- **Charity product:** 100% of profit is donated; tiers differ only by donation amount, not by hardware.
- **Wi-Fi requires flashing:** the ornament ships with basic offline firmware; Home Assistant and Wi-Fi features require flashing the firmware from Apollo's guide.
- **Battery details:** uses a 16340 or RCR123A rechargeable cell; a charger is not included and the battery ships to the USA only.
- **2025 edition:** adds four dedicated song buttons (no multi-click), an ESP32-C6 with 8 MB flash, 58 RGB LEDs (up from 22), and a logo light.
